Education

- WAEC/SSCE 2021 | Federal Science and Technical College, Uromi.
- NABTEB/NTC 2021 | Federal Science and Technical College, Uromi.
- Bachelor of Engineering (Present) | University of benin, Edo State.

Skills & Abilities

- **PROGRAMMING LANGUAGES**
 - HTML/CSS, Javascript, Typescript, Dart, PHP, SQL
- **TECHNOLOGIES/Framework**
 - FRONTEND: React, Alpine.js, JQuery, Htmx, Bootstrap, Sass, TailWind.
 - BACKEND: Laravel, Node.js, Express.js, Next.
 - DATABASE: MySQL, PostgreSQL, SQLite, Firebase.
 - VERSION CONTROL: Git & Github.
 - PROJECT MANAGEMENT: Confluence & Jira.
 - SOFTWARE DEVELOPMENT: Agile methodologies, Scrum, MVC, DRY, OOP, CI/CD.

Work Experience

- **WORDPRESS DEVELOPER | JUNEMART [FREELANCE REMOTE] | May 2022 - OCTOBER 2022**
 - **Developed a high-performance E-Commerce Dropshipping website** using WordPress CMS, attracting and serving over 2,000 customers and increasing online sales by 30%.
 - **Integrated and customized the CJ Dropshipping plugin** to efficiently manage product listings, order processing, and inventory, enhancing operational efficiency and reducing manual workload by 40%.
 - **Customized multiple plugins** to meet specific customer requirements, improving user experience and satisfaction, which resulted in a 25% increase in customer retention and positive feedback.
 - **Optimized website performance** by implementing best practices in SEO, resulting in a 20% increase in organic traffic and higher search engine rankings.
 - **Collaborated with clients** to gather requirements, provide regular updates, and ensure the final product exceeded expectations, leading to a successful project delivery and positive client reviews.

- **FULLSTACK DEVELOPER | LONE MESSAGE APP [FREELANCE REMOTE] | AUGUST 2023 - PRESENT**
 - **Developed a web application with the Laravel Framework (MVC Architecture)**, serving approximately 5,000 users, significantly enhancing performance and user experience.
 - **Implemented the repository-interface architecture**, optimizing data handling and improving code maintainability.
 - **Utilized the LiveWire Laravel plugin** to enable real time data updates without page reloading, increasing user engagement.
 - **Designed and implemented custom Middleware** to manage role-based access control, enhancing security and administrative functionality.
 - **Documented code comprehensively**, facilitating future maintenance and ease of understanding for any subsequent developers.
 - Leveraged a diverse tech stack including object oriented PHP, SQL, HTML/CSS, JQuery, Bootstrap, Linux, VSCode and git to deliver robust and scalable solutions.
- **BACKEND DEVELOPER | SHWID MARKETPLACE/LOGISTICS [INTERN] | DECEMBER 2023 - PRESENT**
 - **Developed and maintained backend systems for two separate platforms** (Marketplace and Logistics) using the Laravel Framework, enhancing performance and scalability.
 - **Implemented endpoint-to-action code completion** across both platforms, improving development efficiency and reducing error rates.
 - **Documented code comprehensively**, facilitating future maintenance and ease of understanding for any subsequent developers.
 - **Utilized the repository pattern in Laravel**, improving code organization and maintainability across the system.
 - **Collaborated with team members** facilitating collaboration and knowledge sharing.
 - **Collaborated with frontend developers and stakeholders** to ensure seamless integration and functionality between the Marketplace and Logistics platforms, enhancing overall user experience and operational efficiency.
 - **Optimized database queries and interactions**, leading to improvement in response times and a smoother user experience across both platforms.

Projects

- **MY E-Result | School Management System**
 - **Developed a comprehensive school management system** featuring student and staff management, online result viewing, and library management, enhancing administrative efficiency and user experience across multiple school branches.
 - **Implemented user authentication and role-based access control**, ensuring secure and tailored access for students, teachers, and administrators across different branches.

- **Designed and developed user-friendly interfaces** for managing student records, staff profiles, academic results, and library resources, improving ease of use and data accessibility.
- **Integrated an online result viewing feature**, allowing students and parents to access grades and performance reports conveniently, increasing transparency and engagement.
- **Utilized the LiveWire Laravel plugin** to enable real-time data updates without page reloading, increasing user engagement and system responsiveness.
- **Designed and implemented custom Middleware** to manage role-based access control, enhancing security and administrative functionality.
- **Optimized database queries and interactions**, including implementing lazy loading, resulting in faster data retrieval and a smoother user experience.
- **Documented code comprehensively**, facilitating future maintenance and ease of understanding for any subsequent developers.
- **Utilized a tech stack including PHP, Laravel, MySQL, HTML/CSS, JavaScript, and Bootstrap**, ensuring a robust, scalable, and maintainable application.
- **Collaborated with educational stakeholders** to gather requirements and iteratively improve the system, aligning the final product with user needs and expectations across multiple school branches.

Volunteer Work

- **GDSC UNIVERSITY OF BENIN CHAPTER**
 - **Core team member responsible for developer support**, contributing to team initiatives and enhancing the overall developer community experience.
 - **Coordinated a physical Android Compose workshop**, attracting and engaging a diverse audience of over 30 attendees, resulting in increased interest and proficiency in Android development.
 - **Facilitated a virtual Web Study Jam class**, teaching HTML and CSS to participants, which improved their web development skills and increased participation.
 - **Coordinated a "Build with AI" hands-on learning session**, attracting and engaging a diverse audience of over 60 attendees, enhancing their understanding and practical skills in AI technologies.
